

# a comprehensive integration solution for a hospital 2.0

*To take advantage of digital technologies and improve the quality of services for increasingly demanding patients, Robert Schuman Hospitals Luxembourg called on Econocom to effect its digital transformation by incorporating new technologies into the reception and treatment of patients. Econocom deployed a number of projects tailored to patients' and medical staff's uses and needs.*

Kirchberg hospital is part of the Hôpitaux Robert Schuman, the largest hospital group in the Grand Duchy of Luxembourg.

- **Implementation of a comprehensive digital package** including:
  - **supply and customisation of equipment**: 400 IPTVs in the patient rooms, 130 tablets for e-learning programmes for staff, tablets for patients, 125 digital medical carts for patients, 125 medical carts, etc.
  - **deployment and integration** into the existing infrastructure and maintenance
  - charged as a fee per asset per day
- **Immediate benefits**:
  - for patients: **increased comfort and services**, access to the hospital's customised, informative, educational contents
  - for medical staff: easier access to information, **access to personalised patient records**
  - for the hospital: presents a **modern image** to the community of medical experts.
