

Guaranteed high availability and business continuity

DKV required a environment that could guarantee high availability and the continuity of activities in case of any issue.

Econocom implemented a complete disaster recovery plan with high availability over 2 data centers

- Setup of High Availibitly with server virtualization, storage, data protection and disaster recovery.
- Disaster recovery: similar virtualization and storage platform in second data centre: storage replication, orchestration and data protection
- Technologies: VMWare (vSphere and Site Recovery Manager), IBM Pureflex, IBM iSeries, EMC (VNX, Centera, Avamar, Datadomain, Recoverpoint), Citrix Netsclare loadbalancing, Microsoft SQL & Exchange clusters

2 redundant datacenters with local high availability

an **End to end** solution thanks to thorough technical knowhow in different required areas
