

permanently up-to-date patient records to ensure the best care

Erasmus, a teaching hospital affiliated with the University of Brussels, chose Econocom to assist with the digital transformation of its care units. Econocom offered a paperless solution for patient data and provided an "all-in-one" station on the mobile carts used by healthcare professionals.

- Supply of "all-in-one" ergonomic and hygienic medical stations featuring a high definition touchscreen, fast processor, removable batteries and a webcam all on the same unit
- **Smooth deployment** implemented in stages at the hospital's pace so as to avoid disruption
- For the client:
 - a tool for **accessing, updating and enhancing patient data securely, at any time and from anywhere in the hospital**
 - **no more data duplication** or entering information twice

an "all-in-one" solution

63 medical stations
custom-designed, operational 24/7
and ultra-light

possible future projects
200 extra carts to be rolled out
