

Towards the mobile enterprise

Mobility leads to major changes in the way we work and the way companies are managed. So as to play its part in this revolution, Econocom has created **everpad by Econocom**, a global IT and Telecom services solution focused on the tablet to support companies in their mobility projects.

Supporting companies in their mobility projects

- **Supply** of terminals and **adaptation** to the business environment:
 - > Definition of a dedicated solution
 - > Hardware and software customization
 - > Integration of professional and personal environments
- **Advice** and **integration** into the MIS :
 - > Prior analysis of factors of complexity
 - > Creation of mock-ups in a test environment
 - > Impact study and recommendations for development

Industrializing roll-out in the target environment

- **Adapting means of remote access** to the IT resources:
 - > Securing applications and enterprise data
 - > Connection in SaaS mode and/or virtual sessions for office IT and collaborative tools
- **Installation and parameterization** of servers and communications terminals (in workshop, OTA*, etc.)
- **Support for the user** during change (training, specific service desk, local support)

Simplifying everyday management

- **A single contact point** for handling user demands
- Replacement following accident or theft **within agreed deadlines** thanks to "Ecopad Care"
- Remote management of tablet PCs via a **Mobile Device Management solution**:
 - > Remote distribution of patches and application updates
 - > Management of security policy
 - > Saving and synchronization of data (messages, etc.)

Control of costs and budgets

- Single fee, **adjustable according to use**
- **Precise monitoring** of inventory
- Control of consumption, **invoices and costs**
- Financial management tool to facilitate **recharging to BUs**

BENEFITS

- 1 A innovative **solution adapted** to new forms of use
- 2 Access to the work environment **at any place, any time**
- 3 **Improved productivity** for nomadic employees
- 4 Ease of access to **unified data and tools**

* Over the air: remote wireless updating of applications

everpad : mobility adapted to your business

3 millions
tablets forecast
in France for
2012
(source GFK)
