

digital transformation of a hospital

Econocom, as Grand Hôpital de Charleroi's main financial and technology partner, contributed to the hospital's major digitalisation project, providing financing, roll-out and business continuity for new-generation healthcare equipment.

- A **new economic model** allowing the hospital to turn fixed costs into variable costs (“pay as you grow”)
- **Improved patient well-being** (enhanced content, childcare information booklets, videoconferencing with friends and family)
- **Optimised patient care and reduced costs** thanks to new working processes (shorter consultation times, direct access to electronic health records via the terminal)

235 smart bedside terminals
featuring entertainment and access to the HIS for
the medical staff

7 digitalised, connected
convalescent rooms
